

EURL-Campylobacter

Future activities and closing remarks

Hanna Skarin

EURL-Campylobacter Workshop 2021

Workshop 2022

- Sigtuna (direct bus from Arlanda)
- 26-28 September or 3-5 October?

Proficiency tests 2022

- PT 31: Enumeration (and identification) – chicken skin (10 samples). Mandatory for each MS.
- PT 32: Detection and species identification – pig (or calves) faeces (10 samples). Voluntary.
- PT 33: WGS and cluster analysis of *Campylobacter* –(8 DNA samples). Voluntary.
- Date for send-off: 7th of March 2022

Training courses 2022

- Introduction to bioinformatics for whole genome sequencing data. Organised jointly with EURLs in EURL WG-NGS at ISS, Rome. 4 NRLs. Summer/Autumn.
- ISO 10272:2017Amd1 (detection, enumeration and spp. identification). On-site training at the EURL. 5 NRLs. Autumn.
- Measurement uncertainty. Organised jointly with EURLs in WG MU. Webinar plus on-site training at Anses. 4 NRLs for on-site training. Time not yet decided.

Last minute info/reminders...

- Workshop presentations on the EURL-*Campylobacter* website in the coming month.
 - Presenters, please send in a short summary of the presentation (max 300 words) as soon as possible
- A workshop report will be produced in October
- Please fill in the evaluation of the workshop – the link will be sent at noon today through Questback
- The link to the contact list will be available at the end of the meeting, please check the contact information for your NRL and mark which types of samples your NRL is responsible for (food/animal/feed).

Thank you all and hope to see you soon!
