FUTURE WORK AND CLOSURE

Hanna Skarin and Ingrid Hanssson
SUMMARY OF THE WORKSHOP

- ECDC/EFSA joint databases are now in use for *Listeria*, STEC, *Salmonella* – next step WGS typing data
- EC update on microbial criterion and PHC: Same samples can be split to analyse for *Salmonella* and *Campylobacter*. Samples should be analysed within 48 hours after sampling and transported at max 10°C
- Subtyping questionnaire: 25 labs currently do subtyping - WGS-based subtyping (mainly cgMLST) and PFGE equally common
- The use of different methods for cluster analysis for WGS
- PTs are important quality controls for WGS data
• You did very good this year on the PTs- we need to produce more difficult tests next year
• CASA and Butzler no.2 can be good complements to mCCDA
• Molecular methods: MALDI-TOF and WGS getting more common every year
• There is new learning material on the website
• The name of the ghost in Uppsala castle is Cecilia
PT 19 AND PT 20

- Enumeration (and detection)
- Detection and species identification
- Proposed matrix?

TRAINING COURSES

- On detection and enumeration (February)
  - Send your notification of interest to Hanna
- On MLST (autumn?)
  - Send your notification of interest to Hanna
WORKSHOP 2017

• Nantes in connection with CHRO (10-14 Sept)
• Workshop after?
18th International workshop on Campylobacter, Helicobacter and Related Organisms

10 - 14 September 2017 | Nantes - FRANCE

www.chro2017.com
LAST MINUTE REMINDERS...

• Remember to hand in presentations/remove ppt
• Make sure you have signed the attendance list
• Make sure you have checked the list with NRL contact information
• Please complete evaluation form and leave in the evaluation box
• Make sure to send completed reimbursement form, together with boarding passes and all invoices in return envelope, to Susanna within one week of return. Remember, no receipts = no reimbursement
• Return name tags
THANK YOU FOR YOUR ATTENTION AND HAVE A SAFE TRIP BACK HOME!
